## INTRODUCTION

VOX provides consulting and solutions to support and enable today's high availability, high performance secure enterprise networks. The next era of networking is here, and our team of consultants and technologists can help you negotiate:

- 1) The integration of wired & wireless networks
- 2) Utilizing the right mix of hardware, software & cloud solutions
- 3) Next generation network management & administration
- 4) Creating self-defending, secure networks to meet & exceed compliance requirements

## A COMPREHENSIVE APPROACH

The network is the foundation of all communications, including voice, video, data and more. Today's networks are immensely more complex and more powerful than networks of just a few years ago. In fact, most organizations view the network as critical infrastructure, bringing a whole new expectation of accessibility, reliability and performance. The VOX team has deep network expertise from both business and technical perspectives. We can help you navigate escalating business requirements, new and evolving technology solutions and daunting security threats.

## CONSULTING

- ➔ VoIP & Video Readiness
- ➔ Network Best Practices
- ➔ Quality of Service (QoS)
- ➔ Network Policy Optimization
- ➔ Training
- ➔ System Audit
- ➔ Enterprise Threat Assessments
- ➔ Compliance planning & Mgmt
- ➔ Network Design & Operational Health

## SOLUTIONS

- ➔ Enterprise Route / Switch
- ➔ Data Center Switching
