

# Enterprise Cloud

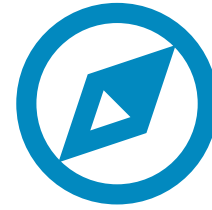

**The technology world has shifted.  
What gear are you in?**

VOX provides consulting and solutions to support your journey with the enterprise cloud. Need help understanding solutions from different vendors and how they align to your business goals, we can help!

**With the Cloud,  
Enterprise technology buyers  
now have greater options.**

In addition to more intuitive and more robust on-premise solutions, cloud-based solutions have achieved a new level of "completeness", where their cost, features, accessibility and security protection have made them a serious alternative for many modern organizations. Ultimately, cloud-based technologies offer organizations another tool, or arrow in their proverbial quiver, as they look to ways to improve their business and outshine the competition.

## PROCESS OPTIMIZATION (VPOP)

vPOP helps you improve business operations and capture new financial gains. We deep dive into your organization's operations to address critical areas to gain efficiencies and cost improvements. We show how to optimize your operations, technologies and teams for substantial bottom line impacts.

### Lower Business Risk

With executive commitment to provide time and access to key resources, the vPOP team conducts initial analysis. This involves evaluating workflows, technologies, current operating costs and customer satisfaction rates. We use this research to consolidate our findings and build a strategy that brings operations into alignment with goals.

### Drive Outcomes

vPOP's outcomes have consistently delivered greater customer satisfaction, optimized workflows, incremental financial gains and a defined technology ROI roadmap. Our industry experts leverage their know-how for operations and finance.

- ➔ Increased Revenue
- ➔ Lower Costs
- ➔ Improved Cash Flow
- ➔ Strong Internal Rate of Return (IRR)
- ➔ Streamlined Operating Procedures and Processes

We help you prosper.
